DAVINCI

ART AND SCIENCE

Flat Panel Digital radiography just came of age....

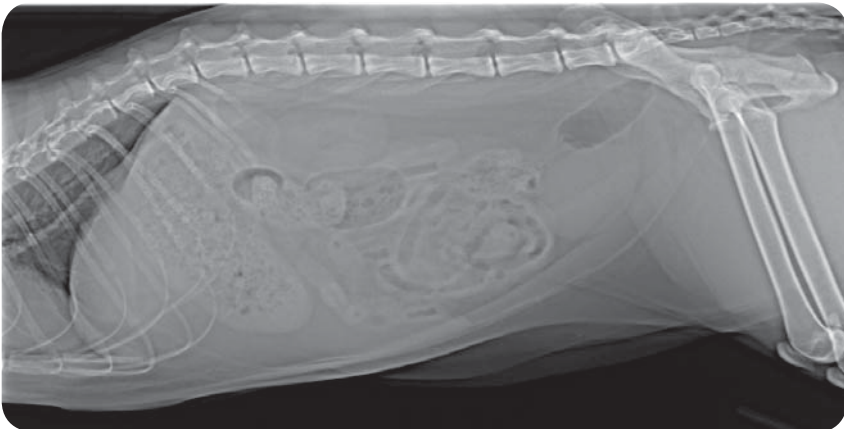

The this new decade will see the renaissance and golden age of the x-ray detector business. Flat Panels detectors will be as common as film was 5 years ago. The reasons? Unparalleled quality, mass produced manufacturing, and affordability.

Until SimonDR introduced Davinci, flat panel digital x-ray was just a thing for wealthy practitioners. Davinci introduces *art and science* in an *affordable* package.

How is Davinci affordable? Simple: manufactured in conjunction with Samsung Mobile LCD, SimonDR has been able to take advantage of the volume of the largest LCD electronics manufacturer in the world and marry them with our existing technologies so we can bring the big-company benefits to the small market.

Warranty? Industry Leading 2 year warranty - expandable up to 10 years!

Detector Specifications		
Imaging Area		17"x17"
Resolution		4.2lp/mm
Pixels		9 million
Phosphor		Csi-Ti
Greyscale		14-bits
Connection		Ethernet
X-Ray Specifications		
	500ma Super High Frequency	
	Typical MaS range 1-15 MaS	
	4 way float top table	
	5 year x-ray warranty
