SIMONDR PODIATRY

SimonDR has always retained the technological advantage over the competition. We maintain this edge in bringing you our latest advancement, the SimonDR podiatry system. The SimonDR DRP system is a premium direct radiography(DR) x-ray system designed specifically for podiatric medicine. Combined with our software, WhiteCap, we stand light years in front of the competition.

Podiatry Features

- High-resolution CCD based direct digital x-ray system
- 5+ line pairs per millimeter
- USB 2.0 compliant connection
- Integrated WhiteCap acquisition and viewing software
- 20MP sensor
- 24" monitor with 1000:1 contrast ratio
- Aids in HIPAA compliance
- 2 Terabyte redundant hard drives—storage for more than 100,000 images

Specifications

- Fan-less sealed operation
- Utilizes CCD sensor
- 9" x 14" active image matrix
- 400 nits brightness
- 100% fill factor
- 100AC power supply
- Industrial IT grade server
- Environmental condition range:
 - Temp: 59-95 F/15-35 C
 - Humidity: 35-75% RH

Practice Management Integration

- Automatically populate demographics—eliminate double data entry through modality worklist QR
- Automatically feed images back into the practice management system
- Image distribution without PACS saves thousands
- Integration through DICOM/jpeg import with many EMR systems Speed Radiograph acquisition
- Speeds invoicing time

Warranty

- 24/7 software support for 2 years
- 2-year receptor warranty
- Standard 5-year orthoposer warranty
- Extended warranty available for up to ten years
